

FINAL THOUGHTS

OUR FINDINGS

To generate more hypothesis test visualizations, feel free to use the report generation tool once again. If you'd like to see the results of tests without visualizations, our tool comes with a folder called `combined_results` containing csv files that list the results of every possible test. Finally, you can also find more a more detailed analysis of these results in our research report, also located within `combined_results`.

You can download the Bongo Bongo report generation tool [here](#).

Our data processing and analysis can be found [here](#).
